

skin	
tattoo	LT 2577 (imported) RD 04
birth	30/12/1987
paternal assessment	
father	Furia (Italian)
mother production	8093 pounds 270 days 3rd lactation
maternal assessment	
mother	Bandieira AS (Italian)
milk production	7297 pounds 257 days 3rd lactation
progenie assessment	
number of cubs	278
weaning department	0,6
post-weaning department	3,3
recommendation	Herds need a Italian genetic shock, giving high milk production to the wombs and higher precocity to the males, genealogy has Furia and Malandrino, genetics proven in the improvement of milk production.
